Degree Undergraduate (2020-2024)

SUMMARY

I am a full stack web developer, worked with some of most emerging and famous libraries like React, Express. I love doing coding in javascript. I also know a bit of **Git** and **project management in Git** so I can easily collaborate with other developers in order to make something robust.

TECHNICAL SKILLS

JavaScript frameworks | Git | JSReact | NodeJS |Back-End Services | Front-End Web Design
Languages: *Javascript, Node ,C++,Python*
Databases: *MongoDb*

TRAINING

	Nov '21 - Present
Edureka	online

I did 5 months training in full stack web development in Edureka.

EDUCATION

B-TECH IN COMPUTER SCIENCE	Aug '20 - Jul '24

UIET, PANJAB UNIVERSITY

- CGPA - 8.85

10+2	Aug '20 - Jul '24

S.K.S.V.M INTER COLLEGE

- Pecentage :74%

HIGH SCHOOL	Aug '20 - Jul '24

AAKANKSHA HIGH SCHOOL

- Pecentage :82%

CERTIFICATIONS/TRAINING

- **Full Stack Web Development| Edureka | online |(Nov 2021-Apr 2022)**

ADDITIONAL INFORMATION

- I did F.E.A PD course.

PROJECT

Project 1: Build a **FOOD WEBSITE** with **ReactJS, NodeJs, MongoDb** |
    Link : https://elegant-basbousa-5090c8.netlify.app/ | https://github.com/kripanshumishra/food-app
- Used **Node** in backend with **Express** for **API**
- **JWT , BCRYPT** library for **Authorization** and **Authentication**
- User can login, logout, search for restaurant and can filter the option on the bases of cuisine, price range.
- User can also add product to cart.

MINI-PROJECT

Project 1: Build a basic website to learn **state Management** in **Redux**| https://traskart.netlify.app
- Used **Redux** for state management and **Express** for **Api.**
- User can add the product to cart.
- No authentication is build for now but implement it in future
